Special Exposure Cohort Petition under the Energy Employees Occupational Illness Compensation Act U.S. Department of Health and Human Services
Centers for Disease Control and Prevention
National Institute for Occupational Safety and Health

OMB Number: 0920-0639 Expires: 05/31/2007 Special Exposure Cohort Petition — Form B Page 1 of 7 Use ordinis formand disclosure of Social Security. Number are voluntary, Failure, to use this form or disclose this number will not result in the denial of any right, benefit, or privilege to which you may be entitled as General Instructions on Completing this Form (complete instructions are available in a separate packet): Except for signatures, please PRINT all information clearly and neatly on the form. Please read each of Parts A — G in this form and complete the parts appropriate to you. If there is more than one petitioner, then each petitioner should complete those sections of parts A - C of the form that apply to them. Additional copies of the first two pages of this form are provided at the end of the form for this purpose. A maximum of three petitioners is allowed. If you need more space to provide additional information, use the continuation page provided at the end of the form and attach the completed continuation page(s) to Form B. If you have questions about the use of this form, please call the following NIOSH toll-free phone number and request to speak to someone in the Office of Compensation Analysis and Support about an SEC petition: 1-800-356-4674. A Labor Organization, Start at D on Page 3 An Energy Employee (current or former), Start at C on Page 2 If you are: □ A Survivor (of a former Energy Employee). Start at B on Page 2 A Representative (of a current or former Energy Employee), Start at A on Page 1 Representative Information -- Complete Section A if you are authorized by an Employee or Vor(s) to petition on behalf of a class. A.1 Are you a contact person for an organization?

Yes (Go to A.2) No (Go to A.3) A.2 Organization Information: Name of Organization Position of Contact Person Name of Petition Representative: A.3 Mr./Mrs./Ms. First Name Middle Initial Last Name Address: Street Apt# P.O. Box Zip Code City State A.5 Telephone Number: () A.6 Email Address: Check the box at left to indicate you have attached to the back of this form written authorization to A.7 petition by the survivor(s) or employee(s) indicated in Parts B or C of this form. An authorization form for this purpose is provided.

If you are representing a Survivor, go to Part B; if you are representing an Employee go

Special Exposure Cohort Petition — Form B

Public Burden Statement

Public reporting burden for this collection of information is estimated to average 300 minutes per response, including time for reviewing instructions, gathering the information needed, and completing the form. If you have any comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, send them to CDC Reports Clearance Officer, 1600 Clifton Road, MS-E-11, Atlanta GA, 30333; ATTN:PRA 0920-XXXX. Do not send the completed petition form to this address. Completed petitions are to be submitted to NIOSH at the address provided in these instructions. Persons are not required to respond to the information collected on this form unless it displays a currently valid OMB number.

Privacy Act Advisement

In accordance with the Privacy Act of 1974, as amended (5 U.S.C. § 552a), you are hereby notified of the following:

The Energy Employees Occupational Illness Compensation Program Act (42 U.S.C. §§ 7384-7385) (EEOICPA) authorizes the President to designate additional classes of employees to be included in the Special Exposure Cohort (SEC). EEOICPA authorizes HHS to implement its responsibilities with the assistance of the National Institute for Occupational Safety (NIOSH), an Institute of the Centers for Disease Control and Prevention. Information obtained by NIOSH in connection with petitions for including additional classes of employees in the SEC will be used to evaluate the petition and report findings to the Advisory Board on Radiation and Worker Health and HHS.

Records containing identifiable information become part of an existing NIOSH system of records under the Privacy Act, 09-20-147 "Occupational Health Epidemiological Studies and EEOICPA Program Records. HHS/CDC/NIOSH." These records are treated in a confidential manner, unless otherwise compelled by law. Disclosures that NIOSH may need to make for the processing of your petition or other purposes are listed below.

NIOSH may need to disclose personal identifying information to: (a) the Department of Energy, other federal agencies, other government or private entities and to private sector employers to permit these entities to retrieve records required by NIOSH; (b) identified witnesses as designated by NIOSH so that these individuals can provide information to assist with the evaluation of SEC petitions; (c) contractors assisting NIOSH; (d) collaborating researchers, under certain limited circumstances to conduct further investigations; (e) Federal, state and local agencies for law enforcement purposes; and (f) a Member of Congress or a Congressional staff member in response to a verified inquiry.

This notice applies to all forms and informational requests that you may receive from NIOSH in connection with the evaluation of an SEC petition.

Use of the NIOSH petition forms (A and B) is voluntary but your provision of information required by these forms is mandatory for the consideration of a petition, as specified under 42 CFR Part 83. Petitions that fail to provide required information may not be considered by HHS.

Name or Social Security Number of First Petitioner.

SPECIAL EXPOSURE COHORT PETITION SUPPLEMENTAL INFORMATION

Pay 10,2606

Section E.1: The name of the DOE Facility is Sandia National Laboratory, Livermore, California.

Section E.2: The location at the Facility relevant to this petition is the X-Ray Diffraction and Fluorescence Laboratory, E ...ease see enclosed affidavit from .

Section E.3: The iob titles and duties were as follows. This x-ray lab only employed two people, M

Mr.

was the lead engineer and I was the supporting technician. We both supported the operation of the laboratory and shared responsibilities. Our job duties required being in the vicinity of the x-ray machines while they were energized. However, my every day responsibilities included sample preparation, sample analyses, x-ray diffractometer and powder camera calibrations, and maintenance of the X-ray fluorescence units and the x-ray generators. Performing these tasks required being very near the ionizing radiation source and having physical contact with the laboratory equipment, again while the x-ray machines were fully energized. Consequently, I was therefore subject to greater amounts of radiation exposure during my tenure.

ontinued to operate the x-ray lab after my departure, but on a limited scale.

Section E.4: Employment dates relevant to this petition are from (), 1971 to 1978.

Section E.5: This petition is based on unmonitored, unrecorded, and inadequately monitored The X-Ray Diffraction and Fluorescence Laboratory utilized ionizing radiation produced by Norelco X-Ray generators to characterize a multitude of weapons grade elements and compounds, of which were radioactive, toxic, and classified. My employment required a "Q" level clearance as many of the components of which we worked on were "Classified". All of the work, including sample preparation and x-ray analyses, were performed in the laboratory with just the room air ventilation, a lab coat, and a dosimeter worn behind my Clearance badge. Sandia did not provide any permanently mounted instrumentation for continuous recording of the ionizing radiation that was being emitted about the laboratory on a daily basis. A portable Geiger detector was often used to check for abnormal circumstances where there were significant radiation leakages. Shielding devices were utilized whenever possible, however they did not conform to today's standa___ I I had to fabricate our own custom-made x-ray shielding devices to compensate for classified components. Consequently, ionizing radiation exposures were inevitable and pretty much an every day incident, as some scattered radiation would be emitted, even under the very best circumstances. Exposures were even greater during diffractometer alignment, specialized, and oversized sample preparation and analyses. In summary, due to the lack of monitors and poor performing dosimeters radiation exposures and radiation doses were unmonitored, unrecorded, and inadequately monitored. Dosimeters are discussed in detail in paragraph F.1.

The Norelco x-ray generators were normally energized daily at 40 Kilovolts and 20 milliamps. X-ray analyses would typically take the entire day and frequently extended into the evening hours, as data collection took numerous hours and even days. I often returned to work in the evening to continue analyses and monitor the x-ray equipment.

Section F.2: The basis for proposing that radiation-monitoring records have been lost or possibly destroyed can further be exemplified by citing an exposure incident that occurred in February of 1978. While calibrating a diffractometer I received an accidental elevated exposure of ionizing radiation to my fingers of my right hand, right arm, head, and the upper trunk of my body when the x-ray beam safety interlock shutoff failed. The exposure I was receiving went unnoticed until a later step in the procedure called for a fluorescent screen to be placed in the x-ray beam to verify alignment. The x-ray generator was energized at 40 Kilovolts and 20 milliamps during the exposure. The generator was immediately de-energized and accident report was filed. Sandia's Health and Safety Department investigated the incident. As I was wearing the then approved dosimetry device, safety representatives attempted to reconstruct the incident with unexposed dosimeters to document the potential x-ray exposure and an estimated radiation dose. In 2004, I requested my dosimetry records from Sandia. I was sent dosimetry records for only a six vear period ____ ... After making a second request, I was told that no other dosimetry data records or even documentation regarding the accident report could be recovered and that all avenues of retrieving the records have been exhausted. Unfortunately, the crucial time period from are no longer available I attempted a third request after being informed that dosimeter records were now available. Again, I was sent dosimetry records for the same six-year period. Incident report records were not available either. I have enclosed my Record of Occupational Radiation Dose that I received from Sandia National Laboratories, Livermore, California on Years of exposure and dose records are apparently missing. In summary, this incident further indicates that radiation exposures and the radiation dose that I incurred are unknown due to lost dosimetery records and missing accident reports. In conclusion, even if dosimetry records could be retrieved, it appears that they would be inaccurate as they were inadequate at monitoring and recording the ionizing radiation exposures that I received.
